## Career Objective

---

Junior Web Developer with strong front-end skills in HTML, CSS, Bootstrap, and JavaScript. Currently learning the MERN stack and building real-world projects to advance into full-stack development. Focused on writing clean code, improving problem-solving skills, and delivering responsive user experiences.

## Education

---

### B.E. – Electronics and Communication Engineering

Expected 2026

M.A.M. College of Engineering and Technology, Trichy

CGPA: 7.0

## Experience

---

### Frontend Developer Intern — Cognifyz Technologies

Jun–Jul 2025 (Remote)

- Developed 5+ responsive pages using HTML, CSS, JavaScript.
- Improved UI structure, loading speed, and mobile responsiveness.
- Built interactive UI components and practiced Git/GitHub workflow.
- Strengthened debugging and frontend optimization skills.

## Web Full Stack Development Projects

---

### Full Stack To-Do App (MERN) *MongoDB, Express.js, React.js, Node.js*

- CRUD task manager with authentication and validation.
- REST API backend with MongoDB; React UI with Axios.
- Implemented modular folder structure for cleaner maintainability.
- Live: vsuji-todoapp.netlify.app

### Portfolio Website *HTML, CSS, Bootstrap, JS, AOS*

- Responsive portfolio with animations and dark/light mode.
- Optimized images and CSS to improve performance and loading speed.
- Live: vsuji.netlify.app

### Cake Shop Website *HTML, CSS, Bootstrap 5, JavaScript*

- Smooth UI with product cards, animations, sticky navbar.
- Built reusable Bootstrap components for faster layout development.
- Live: vsuji-cakeshop.netlify.app

### Weather App *HTML, CSS, JavaScript, OpenWeather API*

- Real-time weather using async/await API integration.
- Added error handling for invalid city names and network issues.
- Live: vsuji-weather.netlify.app
